2010 SPRING GROUNDS MAINTENANCE WORKSHOP

These Grounds Maintenance workshops are a stimulating way to learn more about turfgrass, shrubs, ornamentals, flowers, weeds, trees, soils and soil fertility, and landscape safety. By attending this workshop, Kansas commercial pesticide applicators can receive recertification credit hours towards their applicator license.* These workshops are packed with the latest research-based information that you can use to improve your landscape and enhance your business and productivity. Attending one of these workshops is a great way to solve some of your landscape management problems, gain productivity tips, and network with other horticulture professionals. This workshop is being offered at various locations throughout the state of Kansas.

Several Extension Specialists will speak on the latest research information and landscape topics including: advances in weed management, common insects found in turf and ornamentals, safety training for horticulture professionals, and promoting the landscape industry with Healthy Yards and Communities. You will also learn about soil fertility, plant nutrition, and the soil-plant-water relationships. This is an easy way to get answers to your questions from K-State turf and landscape researchers. We hope to see you there.

***These workshops will take place from 8:30am to 4:00pm. Registration is \$25.00.*

Morning and afternoon snacks will be provided.

Space is limited, so register early.

*Attendees can receive 2 credit hours in 3A and 2 credit hours in 3B towards their KS Commercial Pesticides Applicator recertification.
