Subject: [K-STATE_TURF] K-State turf: quick link for Pythium

Hello,

I was thinking of sending stuff related to Pythium next week, but after seeing it today in a sample (ryegrass fairway), I figured I should go ahead and send it out now.

Here's a link for some information:

<http://www.plantpath.ksu.edu/DesktopModules/ViewDocument.aspx?DocumentID=983>

In Kansas, perennial ryegrass and creeping bentgrass fairways are the most common sites for Pythium. It's very rare in putting greens.
